Magic Mint

The AI studio for influencer content

One workspace to train personas, generate images & video,
and ship campaigns — across the best models, including
Claude.

AI influencers

Claude MCP

THE PROBLEM

Creators juggle five tools to ship one post.

- **Fragmented stack** — Midjourney + Runway + CapCut + ChatGPT + Drive, all billed separately.
- **Broken identity** — every generation looks like a different person; brands can't stay consistent.
- **No workflow** — prompts, refs, and exports live in chat threads and random folders.
- **Slow campaigns** — a week of Instagram content takes days of tab-switching, not minutes.

THE PRODUCT

One canvas. Every model. A consistent face.

01

Train an influencer

Upload a reference, name them, then @mention them anywhere — face and style stay locked.

02

Generate on a node canvas

Images, video, face swap, upscale, and motion control in one graph — not five subscriptions.

03

Talk to Claude

MCP connector turns Claude into a creative engine: batch campaigns from one conversation.

WHY IT WINS

Not another chatbot wrapper.

- **Model agnostic** — Flux, Seedream, GPT Image, Kling, Nano Banana, and more, one credit balance.
- **Identity layer** — LoRA / persona training so the character is a product asset, not a lucky prompt.
- **Workflow canvas** — creators think in pipelines; Magic Mint matches that mental model.
- **Automation path** — Growth+ unlocks Claude MCP; Creator adds agent + 4K video stack.

WHO IT'S FOR

Solo creators → content agencies.

AI influencer builders

People monetizing synthetic personas on IG, TikTok, Fanvue, and brand deals who need volume + consistency.

Social / UGC teams

Agencies shipping weekly content calendars without hiring a full shoot crew for every look.

Freelance creators

Operators who want pro models without juggling five logins and five invoices.

Automation-first power users

Growth & Creator tiers: canvas + Claude MCP for batch campaigns from conversation.

BUSINESS MODEL

Credit subscriptions. Clear upgrade path.

Builder

\$29/mo

500 credits · image-first entry

Launch

\$45/mo

1,000 credits · persona training

Growth

\$79/mo

4,000 credits · video + MCP ·
most popular

Creator

\$99/mo

6,000 credits · 4K + agent ·
best value

Annual billing drops effective monthly to \$2.99–\$23.99.

Checkout via Whop.

TRACTION & STAGE

Product live. GTM in motion.

Shipped

Live product at magicmint.pro — canvas, influencers, image/video, auth, paid plans.

Differentiation

Persona + canvas + Claude MCP in one SKU. Competitors usually pick one of those three.

Next 90 days

Creator acquisition, MCP-led virality, tighten unit economics, deepen agency workflows.

The math: ~1,300 Growth seats — or ~1,100 Creator.

Target mix

~1,000 Growth (\$79) + ~250 Creator (\$99) ≈ \$104k MRR.
Blended ARPU ~\$83. Annual deals front-load cash.

Funnel assumption

Paid + partner traffic → 8–12% trial/paid start → 40%+ land on Growth. Need ~12–15k qualified visits/week if conversion holds.

- **Week 1** — Close 10–20 affiliate / Whop / AI-tool newsletter deals; ship 3 demo videos (persona, canvas, Claude MCP).
- **Week 2** — Paid acquisition (Meta + YouTube + X) at CAC < 1× first-month ARPU; daily creator UGC contest.
- **Week 3** — Agency / “AI influencer agency” outbound: 50 intros, 10 pilots at Creator annual.
- **Week 4** — Double spend on winning creatives; launch limited Founding Creator annual (cash spike toward \$100k).

HOW WE SCALE IN 30 DAYS

Four engines running in parallel.

01 · PERFORMANCE

Paid + Whop distribution

Aggressive creative testing on hooks that sell identity (“same girl, 30 looks”). Budget scales only on payback < 30 days.

02 · AFFILIATES

Creator & tool affiliates

30–40% rev share for first 3 months. Target AI influencer YouTubers, Discord servers, and “faceless” course audiences.

03 · PRODUCT-LED

Claude MCP virality

Every MCP session is a demo. Ship shareable “campaign from one prompt” clips; Claude directory + Reddit + X loops.

04 · B2B SPRINT

Agency land-and-expand

Sell seats in packs (5–20). One agency at Creator × 15 seats = ~\$1.5k MRR. Twenty such logos = \$30k alone.

Requires: ad cash or partner distribution, support coverage, and model-cost controls so gross margin stays healthy while we scale.

THE ASK

Help us put Magic Mint in every creator's stack.

Whether you're investing, partnering, or distributing — we're looking for people who understand creator tooling and want a wedge in AI media.
